

# AP ENVIRONMENTAL SCIENCE

How can we rethink our use of the world's resources?

## THE 7 PROJECT CYCLES

### Course Introduction

What does sustainability mean?

Course Introduction

### Ecological Footprint

How can my family reduce our ecological footprint?

Ecological Footprint

### My Community Ecology

How can our community develop more sustainably?

My Community Ecology

### Food Systems

How can we meet the needs of our growing human population while sustaining ecosystems and the quality of our soil and our water?

Food Systems

### Oceans in Action

How can we balance the needs of humans with the needs of the ocean?

Oceans in Action

### Global Climate Summit

How can the global community collaborate to support more environmentally conscious and equitable use of energy resources?

Global Climate Summit

### Course Closure

How can we rethink our use of the world's resources?
